

## ORIENTALS IN EMPIRE ARE BIG PROBLEM

Annual Joint Meeting of Historical Society and the Economics Club Held

NAIRN AND TENNANT  
Presidents of Clubs Were  
Speakers Last Night—Sir  
Arthur Presided

The status of the Oriental in the British Empire his distribution throughout the various countries and the social, economic, and political problems precipitated by the relations with different races were the subjects of discussion at the annual joint meeting of the Economic and Historical Clubs held in the Union last night. Ralph Tennant of Arts '26 president of the Historical Club dealt with the problem of Oriental races in Canada, Australia and New Zealand, while Gordon Nairn, also of Arts '26 and president of the Economics Club, treated the same question as it exists in India, South Africa, and Kenya. Sir Arthur Currie presided while several members of the staff were present and took part in the discussion held at the end of the meeting.

The problem of the yellow races is acutely brought to a head by the pressing population of Eastern countries. Tennant began, food and land for these tremendous numbers must be obtained and the Far East looks hopefully to the West where the population is less dense and where the potentialities for development are great. Japan has loomed forth the leader and considers itself the guardian of the yellow races. It has developed a superiority complex similar to the feeling of superiority of the white races.

The objection to the Oriental races, stated Tennant, is economic. Their willingness to work for low wages long hours and under conditions of labour intolerable to other peoples, has proved detrimental to the native workman. Organized labour in all countries has unalterably opposed the admittance of Orientals into the country.

### Social Difficulty

There is also a social difficulty. Tennant continued. The civilization of the Orient is so widely different from that of the West that the two are incompatible of fusion. The Japanese or the Chinese are extremely slow assimilators. It is difficult to Canadianize them. This fact must be taken into account in seeking the cause of the opposition to Oriental immigration. Tennant then proceeded to deal with the specific races. The immigration of Hindu into Canada is nil. In 1908 over two thousand came in and since then there has not been a very heavy influx. The fact that a head tax of \$200 is demanded of them may act as the retarding influence. There are 1,016 Hindus in the country at present.

Chinese immigration is now confined to merchants and students. The head tax of \$500 which had hitherto been exacted on entrance to the country has been abandoned. In 1923, there are 38,567 Chinese in Canada, most of them being in British Columbia.

Japanese immigration into Canada is now regulated by a gentleman's agreement which limits the number of Japanese immigrants to four hundred a year. This agreement has been honourably adhered to by the Japanese and seems to work out well. There are 15,878 of them in Canada.

### Australia's Problem

Proceeding to deal with the problem of the yellow races in Australia and their recognized status there, Tennant

## Joint Meeting Of Clubs Set For Tomorrow

The Sociological and Psychological Clubs are to hold a joint meeting tomorrow evening at 8 o'clock in the lower theatre of the Biological Building.

A discussion by members of the Psychological Club on the contribution of psychology to society will feature the meeting which will be for the Sociological Club the last of the year. The latter organization is to elect officers for next year.

After the discussion and just before the serving of refreshments there will be a slight change from the usual form of the meeting when dancing will be indulged in.

## SMITH IS ELECTED HEAD OF S. C. A.

Annual Meeting of Body Was  
Held Yesterday in Strathcona Hall

PRESENT REPORTS

Board and Officers Are  
Chosen for Coming Year  
—Avison Speaks

R. J. Smith was elected to the office of president of the Students' Christian Association at the annual meeting of that body held last night in Strathcona Hall.

After the reading of the minutes by E. R. Jacobsen, and the presentation of the president's report by C. L. Copland, the reports of the directors of the various groups were submitted and accepted by the meeting. A vote of thanks was proposed by R. B. MacLeod and seconded by R. J. Smith to the Ladies' Auxiliary for their untiring efforts in the interests of the students, and regret was expressed that that body has ceased to exist. The new board was also elected and is to consist of the following students: C. L. Copland, S. Allan, E. R. Jacobsen, M. Estall, J. Smit, C. Davies, P. Mathews, C. Knowles, F. MacNaughton, Fred Scott, R. J. Smith, and K. Oxley.

The annual meeting of the Y. M. C. A. of McGill University was also held at which Judge Howard gave an outline of the history of that body and of its constitution and advised the association to adhere to its character as closely as possible in order to avoid future difficulties.

H. R. C. Avison, then gave a short address to the gathering. He pointed out that in order to carry on the work of the S. C. A. effectively, it is necessary to make clear the aim of the association, and to follow that aim zealously. He pointed out that people are trying to discover what is the will of God. This is a very difficult question, and because it is difficult there is a necessity for intellectual action and keen minds.

The speaker further stated that it is not necessary to devote all of one's time to the movement, but the all-important factor is the realization of the importance of the idea.

pointed out the tests required by the government. This is a Dictation Test. The language in which this test is to be given is not specified so that a Chinaman may be asked questions in Welsh. The number of Chinese in the country is declining.

In New Zealand no person is allowed entrance without the permission of the Minister of Customs. Immigration of Orientals into the country is negligible.

While March is Stormy  
McGill's First Banana  
Crop is Duly Gathered

While McGill students turned up their collars to meet the wintry blasts and Gilda Gray "strutted her stuff" on the snow bound campus the gardener in the green house behind the Biological Building plucked a few bananas off the tree and looked to see if the oranges and pineapples were ripe yet. For there in the green house are to be found many varieties of tropical plants growing under a tropical temperature.

The banana trees were presented to Prof. Lloyd by the United Fruit Company and when they arrived they were in a half-dead condition but with good care they were brought to the present stage in their development. This was done about three years ago when the house was first started and now the trees have grown from small plants to trees ten feet in height.

The first crop of bananas was gathered this winter and they were found quite delicious. Prof. Lloyd declared. The oranges which grow on small plants about one foot high are not quite ripe but will soon be ready for consumption. The house also contains a large collection of desert and water plants. The house is heated by steam but on sunny days the heat of the sun is sufficient for the purposes of the plants.

### SCIENCE LECTURE

Prof. H. E. Reilly is to be the speaker at the eighth lecture in the science extension series. He will discuss "Sound."

## CAMPUS GROUP TALKS ABOUT SOCIETIES HERE

Historical, Canadian and Music Clubs Subject of Criticism

CENTRALIZATION

Detrimental to Culture,  
Claim—Discuss "Daily"  
—Suggest Improvements

Methods, for stimulating more interest among the student body for cultural activities at McGill University, were examined at a meeting of the Campus Problems Discussion Group which met at Strathcona Hall yesterday afternoon.

Jack Duckworth who acted as chairman in the absence of Errol Amaron asked the group—which meets once a week—to discuss and, if possible, offer solutions for vexing problems of the campus—for their suggestions on stimulating student interest in cultural activities.

At the last meeting of the group all those present were of the opinion that the student body gave preference to athletics at the expense of culture. Moreover, the causes leading to this condition were examined. Hence, at yesterday's meeting, Duckworth called for suggestions as to measures that would tend to reverse the student preference in favour of cultural interests.

It was thought fit to see wherein the cultural clubs and societies at present existing were deficient, before examining or adopting new methods. The cultural activities on the campus at present it was decided are in the main the following: the Literary and Debating Society, the Music Club, the Economics Club, the Sociological Club, the Historical Society, the Canadian Club, the Players' Club, the Fortnightly Review, and the Daily.

The main questions as regards the above activities, were "Why do not these various clubs and activities attract more student interest? How can they be reformed?"

The general criticism with regard to the working of several of the clubs was that there was too much centralization. This centralization in the hands of the Students' Council was detrimental to cultural interests though often advantageous for financial reasons. The Music Club, which was cited as a conspicuous example, puts on one concert a year and has become only a money-making scheme, not a cultural benefit to those who cannot play an instrument but who appreciate music.

More particular criticism was directed toward the Canadian and the Historical Clubs. It was suggested that the Canadian Club should endeavour to secure better speakers than it has been accustomed to invite. Mediocre speakers will not increase student interest in the Canadian Club. This Club should of right stimulate political and cultural thought by means of good speakers. As for the Historical Club, it was deemed too conservative and too select. This Club is closed to several students who would, if allowed, take a very keen interest in historical problems.

## CHARLESTON IN GYM

Claim Students Practise Dance in Molsion Hall

That the Charleston is aiding in the destruction of Molsion Hall was a claim made in certain circles at McGill yesterday.

Evidence revealed that many students had been practicing the difficult steps of the dance craze upon the weak floor of the gym.

Owing to the stamping of feet the walls are said to have been shaken.

## COLOUR MEN

Colour men who have won their letters this year are requested to bring their certificates to the Athletic Manager's Office in order that they might be entered to date it was announced last night.

## RADIO ASSOCIATION

The Radio Association is to visit the Northern Electric Company's Broadcasting station CHYC leaving the Engineering Building this afternoon promptly at 5 o'clock.

## HISTORICAL CLUB

The annual meeting of the Historical Club is taking place this afternoon at 5 o'clock in Room 5 of the Arts Building.

## Sir Arthur To Be Guest At Rifle Dinner

Sir Arthur Currie is to be the guest of honour at the annual dinner of the Rifle Association which will be held tomorrow night in the McGill Union.

Following the honouring of the customary toasts J. Home will propose the toast to the Alma Mater to which Sir Arthur Currie will reply. C. H. Herbert, toastmaster, will toast the honorary officers Dr. Eve and Dr. Day, and to this Dr. Eve will make the reply. J. M. Pope will toast the club, and the reply will be made by Dr. Day.

Replicas of the Birkett Cup are to be presented to Dobridge Pope Lyons and Taylor who compose the second year winning team.

## TWENTY-TWO ENTER ORATORICAL CONTEST

Impromptu Speaking for Cup Tomorrow in the Strathcona Hall

ANNUAL EVENT

Final Entries to be Taken up to Thursday Noon—To Announce Details

Twenty-two men are entered to date for the annual impromptu speaking contest for the Talbot-Papineau Memorial Cup which is to be held tomorrow evening in Strathcona Hall at 8.30 o'clock. The list is a formidable one, the majority of the orators having on various occasions exhibited their ability as fluent and graceful public speakers. A keen contest, as a result, is expected, the executive of the "Lit." stated last night.

Mrs. Robert Reford, donor of the cup, which has been awarded for the last three years by her to the best impromptu speakers here will not be present this year to give the cup in person to the winner. Inasmuch as she is at present in Europe, Col. Wilfrid Bovey will be present and will tell of the significance and history of the cup.

It was further announced that any person desiring to enter may leave their names in the letter rack in the Union for the secretary of the "Lit." Entries will be received up to noon Thursday.

The following have entered the contest to date: Harold B. Launde, Paul Casey; E. D. McCaffrey; J. Spector; W. H. Budden; S. E. Schwisberg; A. P. Procter; C. T. Ryan; J. G. Nelles; A. Edel; H. C. Goldenberg; B. M. Alexander; W. P. Kelloway; G. H. Penrose; Ray Caron; A. Gordon Nairn; Lovell Carroll; Gordon W. Webster; Louis M. Dobrofsky; C. McG. Gardner; A. E. Laverly and E. J. Brannen.

The final details concerning the contest are to be published tomorrow.

## STRIKING DECORATIVE EFFECT FOR DANCE

Union Ball Room Being Transformed as Alma Mater Approaches

The Union ball room is gradually losing its usual appearance, and becoming transformed into a bit of the old North West on a clear starlit night, as the Alma Mater Dance Committee continue with their work of decoration. Enough has been done to indicate that the whole scenic effect will be decidedly different from any type of design used in the past, as well as being strikingly beautiful.

A host of young firs have been obtained and are being set up around the walls. Already the rough unstripped timbers of an old H. B. stockade can be seen through the green branches. The ceiling of the ball room is to be flooded with blue light, under which scores of small twinkling globes will give a fine starlight effect. Wonderful work has been done in painting and designing scenes of snow-covered landscapes to be placed on the walls, while highly coloured miniature totem poles have been manufactured to be included in the decorative arrangement.

Judging from the beauty and originality of decoration, the special type of favours being obtained, the quality of the two orchestras that will play, and the rush for tickets, the affair Friday evening should be successful. As announced in yesterday's Daily, some extra tickets are being placed on sale, and may be obtained at the Union.

## ARTS WINNERS IN BASEBALL OVER SCIENCE

Out-hit Opponents—Score of 17-6 is Piled up in Fast Game

LEITHMAN STARS

Indoor Series Ends With Championship for Team of Arts Faculty

Outitting their opponents and playing a good game in the field the Arts Faculty indoor baseball nine vanquished their opponents the Scientists by a score of 17 to 6 yesterday in the Montreal High School Gym. The game was the final of the interfaculty series and Arts are now as a result the College Indoor Baseball Champions. The outstanding feature of the game was the all round playing of Captain Leithman and of Musselman on the Arts' team. Leithman's hitting and his playing at short-stop was beautiful to watch. Covshoff the Arts' pitcher played a steady game and was well supported by his teammates. Consiglio, Jehu and Munro played a good game for Science. The Science pitcher was not up to his usual form and walked many of the Arts Men.

**The First Inning**  
Science loses the toss and Arts decides to take the field. Science went into bats with Consiglio up. Consiglio hits safely. Loomis hits and is put out at first. Jehu hits scoring Consiglio for the first run of the game. Chisholm and Munro fly out. With Laing up Laing's liner is caught out in the field by Chisholm. Menzies is flied out. Leithman hits safely but is put out at home plate by Consiglio. 0 runs—3 out.

**Second Inning**  
Crombie is walked. Godwin is struck out. Spratt hits safely. Cramp is caught out. Altkin hits a long fly which is caught by Menzies. 0 runs—3 out. Held hits a triple. Covshoff hits safely to first scoring Held. Senzilet hits safely. Covshoff is put out on second by Chisholm. Herman scores Senzilet on a sacrifice hit. Musselman hits a double. Laing drives out a liner scoring Musselman. Menzies is flied out. 3 runs—3 out.

**Third Inning**  
Consiglio hits hard for a double. Loomis is caught out. Jehu singles. Chisholm is caught out. Munro is walked. Crombie's long hit is caught by Laing in a circus manner. 0 runs—3 out. Leithman hits safely. Held doubles. Covshoff hits scoring Leithman and Senzilet singles. Herman's fly is caught in the field by Spratt. Musselman hits scoring Covshoff and Senzilet. Gofman's hit scores Musselman. Laing's terrific hit is caught by Jehu. 5 runs—3 out.

**Fourth Inning**  
Godwin singles. Spratt hits safely. Cramp hits and Godwin is forced out on third by Senzilet. Altkin is put out at first. Consiglio is run out at first by Laing. 0 runs—3 out. Menzies is walked. Leithman is (Continued on Page Four)

## CHOOSE SPEAKERS

R.V.C. '26 and '29 Select Representatives

At class meetings held by the R. V. C. seniors and freshmen, three representatives were elected for the public speaking contest featuring the programme at the final meeting of the Delta Sigma Society next week.

Those chosen to represent R. V. C. '26 were the Misses Winifred Griffin, Kathleen Jenkins and Frances Levi-Koff. The speakers for the class of R. V. C. '29 will be the Misses Paylette Benning, Regina Shoolman and Ernestine Ellis.

## WILL BROADCAST

The Rooters' Band is broadcasting tomorrow night from station CNRO. Prior to this there is to be a dinner and general meeting in the Annual Room of the Union at which plans for the next year will be formulated.

## SCARLET KEY

The regular monthly meeting of the Scarlet Key Society is to be held tomorrow evening in the Union at 8 o'clock.

## LINSEED OIL

At the Chemistry Colloquium this afternoon Miss Helen Chataway will be the speaker and will introduce for discussion the subject of "Linseed Oil."

## Dr. H. Barnes To Give Postponed Talk Tomorrow

The postponed lectures to have been given by Dr. Howard T. Barnes, who was suddenly called away from McGill, will begin tomorrow when Dr. Barnes will speak in the Macdonald Physics Building at 5 o'clock on "General Physics of Ice Formation".

The series which go under the general name of "Ice Engineering" will be given every Thursday hereafter until the conclusion of the entire group. On March 18 Dr. Barnes will speak on "Ice Prevention and the Heat Treatment of Ice". On March 25 the subject will be "Ice Pressure on Concrete Structures." The final lecture on April 1 is entitled "General Power House Design."

## C.O.T.C. COMMENDED AT THEIR INSPECTION

Annual Event Took Place at Craig Street Drill Hall Last Night

ARE EFFICIENT

Brig.-Gen. Armstrong Lauds Neatness and General Appearance of Corps

"The drill of the corps is very creditable and better than last year," stated Brigadier-General C. J. Armstrong when he addressed the McGill C. O. T. C. at the Annual inspection held last night in the Craig Street Drill Hall.

"I wish to congratulate you on your smart appearance and the orderly and quick pace which you take when marching in fours. I am glad to see the increased number who tried the practical examinations and I am also glad to say that all of the fourteen who took the infantry examinations passed while only three out of fourteen failed in the cavalry examinations. All those who took the medical exams got through and I hope that next year you will do even better than that," he declared.

When Brig.-Gen. Armstrong arrived accompanied by Col. H. Chase and Major W. Neilson, he was given the general salute by the battalion. The corps was then inspected by companies, after which the march took place. Brig.-Gen. Armstrong taking the salute. Following this the battalion marched past in column of route and later the salute was taken in general review order. This was followed by company and platoon drill, each unit under the command of its own officer. The cavalry carried on squadron drill. This was followed by the address by the inspecting officer.

Lieut.-Col. R. R. Thompson was in command of the corps together with the Adjutant, Major J. W. Jenkins. The corps consists of an infantry company, a cavalry company and a medical company. Captain L. Stephenson was at the head of the infantry with Lieutenants Kingston, Bates and Decker. Lieutenant J. Creighton commanded the cavalry together with Lieutenants G. Hyde and A. Grier. On the Headquarters Staff were Lieut. Bagg, quartermaster and Lieutenants Dawson and W. H. Boyd musketry instructors.

## REVUE USHERS

It was announced last night by the authorities of the Red and White Revue that all the ushers and marshals who participated in the show last week are to leave their arm-band and ribbons at the Union with Mr. G. H. Fletcher.

## TELLS OF THE IMPROVEMENTS IN ENGINEERING

Faculty of Applied Science Made Much Progress During 1924

SURVEYS WORK

Dean H. M. Mackay Outlines Details Concerning the Electrical Wing

That no year for more than a quarter of a century brought such considerable improvements to the facilities required for the work of the engineering departments at McGill than did 1924 is one of the statements found in a general survey of the extensive changes which have taken place in the Engineering Building issued yesterday by Dean H. M. Mackay head of the Faculty of Applied Science. The survey, a comprehensive one, reads:

"During the past year extensive additions have been made to the Engineering Building involving new laboratories for the Electrical, Civil and Mechanical Departments. It was decided last session to withdraw Shop-work from the curriculum of the First Year, and to abolish the Smithy and Foundry entirely. It was felt that work in the University Shops could never take place of experience gained under commercial conditions, and that the time devoted to it could be more profitably employed otherwise. In passing it is gratifying to know that this step has been fully endorsed by graduate opinion.

"A new wing was completed during the summer providing three new floors over the old Smithy and Foundry and extending to the Workman Building. Each floor has an area of more than 4000 square feet, and the three together furnish commodious and well lighted quarters for the laboratories and offices of the Electrical Department. The lower of the new floors houses the main electrical engineering laboratories where the work of the Third and Fourth Year Electrical students is carried on, the direct and alternating current apparatus formerly placed in different laboratories, having been brought together for this purpose. A spacious and well equipped repair shop has been provided at one end of this laboratory in a part of the space occupied by the old wood-working shop. Convenient access to the new wing is provided on the floor immediately above by means of a bridge thrown across to the first floor of the older part of the Engineering Building, at the back of the lecture theatre known to old graduates as Room 33. This floor contains the electrical laboratories for students in other than the Electrical Engineering courses and also accommodates the McGill Radio Association.

"The top floor contains the offices of the staff of the Electrical Department, a small departmental library and two laboratories. The larger of these will be used for Electrical Measurements, the work in which was formerly carried out in the Physics Building. The equipment of the Standardizing Laboratory is also placed here and will be available for senior students. This laboratory is already partially equipped, and by the opening of next session will have sufficient of the most modern testing apparatus to enable the work to be carried on satisfactorily. Further expenditure will, however, be necessary from time to time to complete the equipment and to keep it up to date.

## Advertiser Receives Offer of Loan of Tux For the Alma Mater

WANTED  
A partner (duly) for the Alma Mater Dance; must provide me with a tuxedo suit. No reference necessary.

Apply J. A. M.  
c/o 746 University St., City  
Published in Monday's Daily the above advertisement has precipitated a pile of correspondence for the individual concerned. It was learned last night.

"It pays to advertise" the student in question is alleged to have declared, as he pursued the letters sent him. In the Engineering Building, alleged to be the building within J. A. M. carries on his work—the following letter, one of the many he has received, was yesterday posted and attracted considerable attention. It read in part:

Dear Mr. James: I wish to thank you very much for inviting me to the dance. It was very kind and sweet of you to invite me. I am quite sure that you can wear poppa's tuxedo. It is in good repair and hasn't been worn since his wedding trip in 1870. If you'd like me to get the tickets also I'd be delighted. It would like to get in touch with me call Montreal 1234 or try the Daily.

Again thanking you,  
Yours Sincerely,  
Vilma Facedo.

It is understood that J. A. M. is now deliberating and deciding between the various applicants.

## THE CAMPUS BABBITT.

Those who have noticed our column "Collegiana" in which one is able to see mirrored some of the idiocies which pervade university life on this continent, will by now realize that in the university is to be found one type of student whose presence is disagreeable to such students as come to college in hope of broadening their mind and gaining a cultured and logical outlook on life. This individual is none other than the Campus Babbitt, that same person who swallows his professor's pronouncements and hands them back to him on the examination paper wholesale, that student who delights in rushing around and gathering the latest on campus politics, that man who talks about "College Spirit" in the same broad tones in which Kiwanis and Rotary talk about "Service". The Campus Babbitt is the exact prototype of the Babbitt of the outside world, agreeing with everyone, looking upon all serious critics of established traditions as "crabbers", filled with the dominant idea of Boost, of Optimism, of putting things across "big".

His influence in the university is bad. His presence is disturbing to such students as are not interested in the sublime idiocies with which his frail mind is occupied. He is often the creator of false optimism, and most certainly does not add to that necessary stream of intellectual ferment which should be found in any institution which is to call itself a University. He is one of the "Rah, Rah" crowd, doing what the majority does, following it in a most slavish fashion, ruled only by what others think of him. In fact his sole ambition, it would seem is to be a "regular fellow." He is a stock figure, lacking in insight, devoid of personal magnetism and of individuality.

The university should not be merely a mirror in which the outside world is reflected. If this were the case then it would be perpetually failing in its purpose, for it is generally granted that the outside world is yet in such a chaotic state that to emulate this disorder in the university would be fatal. Rather is the higher institution of learning an ordered thing, in which men come together to think logically and to order their thoughts so as to gain a keener perception into vital problems, a keener outlook on life than is found among the members of the outside world. Rather is the university to be one note of peace and tranquility, of achievement and progress than a mere echo of that symphony of noise and turmoil to be found in the world which surrounds it. Such being the case then, the college is no place for Babbitt, and his presence is completely out of harmony with the surroundings which he should be in.

If only the students could wrench themselves away from the buffoonery and nonsense of the outer world, turn more to keener and more critical thought, take a more serious view of life in general, and yet not completely submerge themselves in the realms of academic endeavour, grapple with the truly outstanding problems, and not with mere trivialities as is the case now, then would we have a worthy university indeed.

As things stand the only logical solution we can offer is that the campus Babbitts and boot-lickers get together and organize a Campus Rotary Club, or a Kampus Kiwanis Klub, and spend their time in mutual admiration of one another's Babbitt-ry. Then perhaps, thus segregated, they would not be such a nuisance as they are today.

## THE CAMPUS GROUP.

The Campus Problems Discussion Group which has been arousing considerable comment of late, was in a critical mood yesterday and in its consideration of certain aspects of college life here came out with charges which certainly merit consideration. The whole object of the meeting, following up the fact that the group had decided that athletics are unduly emphasized at McGill, was to see wherein cultural activity might be furthered here. "How is it that the Literary and Debating Society, the Music Club, the Economics Club, the Sociological Club, the Historical Society, the Canadian Club and the Players' Club do not attract more student interest?" asked the group. And a general criticism was made that there is too much centralization of activity which tends to be detrimental to cultural interests here. The Music Club, it was charged, so far has been doing nothing more than make money. While this is true, the group failed to realize that the Club was merely establishing itself, paying off debts on the piano, and in general preparing itself for real activity, which is to be inaugurated next year. The Canadian and Historical Clubs were also discussed. The exclusiveness of the Historical Club was regarded as tending to keep out many students interested in historical subjects. The Canadian Club, it was claimed, has not brought enough speakers of outstanding note.

And then the group turned to the McGill Daily. We note with interest the constructive criticism made of a sheet which is generally much-abused. The problem of a more comprehensive editorial page is something which may materialize in the future, and the encouragement of more critical articles from students for publication on this page is an idea which would be exceedingly commendable. But it is necessary to have these articles, and so far few have been forthcoming.

If the Campus Problems Discussion Group will do nothing else it should arouse interest in these questions—questions which are worthy of serious consideration and which are being given this serious discussion by the group. A frank discussion of these problems in the correspondence columns would certainly do much to bring about a clearer understanding of questions which are certainly of more than passing significance here.

## COLLEGIANA

Culled by L. S.

### PROEM.

THE theory that every person who has spent several years at a university under the influence of learned professors is educated is as sound as the doctrine that thirteen is an unlucky number, and about equally as popular. Nothing can be more false—except, perhaps, the notion that one must work very hard to get good marks in examinations. Hidden under the veneer of a degree or an affected skin of education there is a boorish bumpiness and an ignorant ostrich-like complacency which one does not find outside of a small-town alderman or a professional moralist. The intellectual curiosity of the average student is circumscribed by the requirements of a "polite education", to wit, familiarity with the leading names in English literature since Elizabeth, ability to converse with profound generalizations on the political philosophy of Spinoza, and so forth. In order to distinguish them from goatherds they are charged with procuring a working knowledge of the history of music for "no man can call himself cultured unless he is familiar with the rudiments of music." But who ever said that one can obtain more than that at college? It has been well said that education in our colleges comes by degrees.

—L. S.

Satisfactory report of Mr. Dupre Rhame, director of religious activities at Furman University noted in their Hornet:

Approximately two-thirds of the students residing on the campus are regular attendants at church each Sunday, according to statistics compiled by Mr. Dupre Rhame, director of religious activities. On February 14 there were 237 at church out of a total of 379 students who live on the campus. Not quite half of the resident students attended Sunday school and about the same number report being at B. Y. C. U. Only eighty-five reported that they attended nothing, and of this number thirty were sick or out of town. Mr. Rhame is keeping up with the students by having them fill out blanks each Monday, giving the necessary information.

Practical demonstration of college spirit at the Universities of California and Stanford:

Upperclassmen at the University of California and Stanford University wear corduroy trousers. The class loyalty of each is judged by the amount of dirt he is able to accumulate. Sometimes a pair of "cords" is worn two years without being subjected to the indignity of the washbasin.

Too much of a thing is too much, however, and the girls at Stanford have declared war on all men students who do not patronize cleaning establishments.

They declare the fabric of the "dirty cords" is hardly distinguishable from the dirt that covers them, and that they are an offense to the feminine ocular and nasal sensibility.

Retention of Freshman autonomy in enforcing traditions at the University of Washington:

A move to appoint a sophomore vigilance committee to enforce the observance of Freshman traditions, in place of the present Fresh committee, was quelled when the Senior Council decided to leave the enforcement of Freshman rules to first year Students.

Wide range of intellectual diet at the University of Illinois as revealed by the distinguished Daily Illini:

"Who" is the most popular dance record on the campus, according to a survey of the fraternity and sorority houses.

"Sleepy Time Gal," is next in favor but it is distinctly second choice at most of the houses. The third most popular dance piece is "Then I'll be Happy." Going down the line such names as "Five Foot Two," "Charleston," "Ida, I Do," and "Brown Eyes" were given as popular numbers at different houses.

Edifying notice under the picture of Martha Walker appearing in the Concord, N. C. Times:

"Martha Walker, co-ed at the University of Wisconsin, doesn't pet, doesn't smoke, won't bob her hair, and thoroughly approves of chaperones—but has been voted queen of the annual Junior Prom this year. Her home is in Peking, China."

Sinister and demoralizing effects of college on students of Indiana University:

Bluffing among students at Indiana University is more prevalent among sophomores and juniors and among women, according to the opinions of several professors.

The student as a freshman is usually earnest in his work, but by the time he is a sophomore he has a tendency to try "to put one over" on his professors.

State of affairs at McGill University illuminated by an ad. in the undergrad paper:

### WANTED

A partner (lady) for the Alma Mater Dance; must provide me with a tuxedo suit. No references necessary.

Apply J.A.M.  
c/o 746 University St.,  
City.

Red-blooded debating at Queen's University revealed in the headlines of the eminent Queen's Journal:

Sons of Demosthenes Clash Today. Debaters Chew Pebbles in Preparation for Word-Parrying Contest.

Disheartening news from Denver University:

The women at Denver University in the sociology department agreed that a man must have an income of at least \$2200 in order to get married.

Aesthetic note from Washington State College:

Brunettes and brown eyes are preferred by the average college man at Washington State College according to statistics gathered at the news office.

Exact requirements for Baccalaureate holders:

The following advertisement appeared in a Middle-West newspaper:

Wanted Man — University graduate to work in general merchandise store in small interior town and learn to be shoemaker.

One who can help milk the cow and play in the band preferred. Must be man of clean habits; cigarette smokers, sheiks and loafers do not apply. Man who understands gas engines and tractors will be given preference. Users of intoxicating liquors and profane language will not be considered. Man who gets this job must not be too proud and aristocratic to mingle with the livestock and chickens and help out in the kitchen now and then.

Mohocratic determination of students of Butler University:

An indignation meeting at Butler University to protest the resignation of Pat Page resolved itself into a pep session at which the students pledged their support to Paul Hinkle, the new athletic director.

Progress of the higher learning at Kansas State University reported by the Kansas State Collegian:

Photographs of 31 Kansas Aggie coeds have been sent to Cecil B. DeMille, motion picture director, who will pick the winners in the 1926 Royal Purple beauty contest. Results of the contest will be announced some time in the spring, and pictures of the winners will appear in the beauty section of the Royal Purple.

Spirit of Hearst and the tabloids invades Indiana University:

"Would You Rather Have a Show or Dance 'date'?" Raymond Briney, '27—I would prefer a dance date any time. I don't care much about shows.

Jane Adams, '28—I'm all tied up and don't have dates, so I really couldn't say.

Wayne Harmon, '26—A show

## HASTE THEE

UNRAVEL this curdled cloud.  
Wash out the stain of the sun,  
Let the winding of your shroud  
Be delicately begun.

Bind up the muddy Thames,  
Hearken the worm.  
Sew the seams and the hems  
With fine thread and firm.

When the moon is a sickle of ice  
Reaping a sheaf of stars  
Put pennies on your eyes,  
Lie you down long and sparse:

Fold your thin hands like this,  
Over your breast, so:  
Wait for no farewell kiss,  
No funeral show.

—Vincent Starr.

# TURRET

## MILD VIRGINIA CIGARETTES

It's almost too good to be true,  
When you hold up such hands as these two;  
—A "straight flush" to get  
And this choice cigarette—  
Dame Fortune sure smiles upon you.

20 for 25¢

SAVE THE POKER HANDS  
that are packed with Turret Cigarettes

The "poker hands" that are packed with Turret Cigarettes may be exchanged at our Advertising Warehouse, 30 Benoit Street, Montreal, second street east of Bleury, south off St. Catherine Street. This will save you time and postage.

## NEW YORK UNIVERSITY SCHOOL OF RETAILING

Experience in New York's, Newark's and Brooklyn's largest departmental stores. Store service linked with classroom instruction.  
M. S. in Retailing granted on completion of one year of graduate work.  
Fall term opens September 16, 1926.  
Summer School July 6 to August 13, 1926.  
Illustrated booklet on application. For further information write Dr. Norris A. Brisco, Director, Washington Square East, New York City.

A meal is something more than a collection of dishes and a dining-table is more than a convenient place at which to devour food. Mealtime should be welcomed as an opportunity for one to relax amid the company of one's friends—to discuss the various topics of the day or night according to one's fancy. Pierre's Garden-of-Eden, on the ground floor of the Union, first turn to the right, is just the spot you have been looking for. Those who do not take soup will kindly bring their mouth-organs. I thank you

Pierre

## GYM TEAM IN THE LAST EVENT SOON

Will Meet Toronto in the  
Y.M.C.A. Gymnasium  
On March 13

### M.S.P.E. TO HELP

Will Give a Programme of  
Dances, Drills and Games  
Under Miss Cartwright

The last intercollegiate contest to be participated in by the McGill Gymnastic Team with Toronto will take place in the Y. M. C. A. gymnasium on March 13.

The McGill Gymnastic team has been practising assiduously for months for this great event. They will be assisted through the kindness of Miss Cartwright and staff, by the students of the McGill School of Physical Education. This will provide the only opportunity for the public to see some of the practical work they do in connection with their undergraduate course. They will present a programme of dances, drills and games under the supervision of Miss E. M. Cartwright, Miss E. Wain and Miss R. Harvey. The music will be dispensed by Miss Christie.

The Red and White will have a well balanced team representing them this year, two of last year's team being present, Willie Consiglio and Ray Caron, who can be depended upon to give a stellar exhibition. These men, together with H. Weir Davis, represented McGill at Annapolis on February 27, and gave a good account of themselves. The other members of the team will be L. M. Becker, who was a spare two years ago, and is equally proficient on all pieces of apparatus. H. Weir Davis is the find of the year, and, although very good this year, will improve a great deal in the future, having the necessary build for a gymnast.

R. deW. Mackay should star on the horse, and is an able performer on the other pieces as well. The remaining member, C. E. Pacaud, has developed considerably in the past season, and should be heard of in the future.

The officials of the Meet are as follows: M. C.—Dr. A. S. Lamb M. D.—Dr. F. W. Harvey. Judges—Chief—C. B. Fowler, S. Chard, W. Seigel. Timekeeper—F. M. Van Wagner. Scorer—Chief—M. F. Dixon, P. T. Danford.

## TELLS OF IMPROVEMENTS IN ENGINEERING

(Continued from Page One)

Laboratory, which will be equipped with telegraph, telephone and radio apparatus. It will be developed in connection with the course in Communication Engineering which is to be given as an alternative branch of Electrical Engineering. Beginning next session it is proposed to offer in the Third Year one or more alternative courses providing special training in Physics and Mathematics to students electing to specialise in Communications Engineering. The courses in the past have been more specifically directed towards Power Engineering. The need of men specially trained in Communications is being keenly felt in several quarters, and a

## THEATRES

"Ypres" Now  
At Capitol  
Vividly Real

If one was to ever lose control of his feet when the band plays "The British Grenadiers": "If one ever recites that 'every man's a million-aire' if he can only brag that he was born in Canada beneath the British flag," if one's blood ever fires, when one hears the names of Waterloo, Alma, Balaklava, Lucknow and the Residency; if one ever feels proud of Canada and Canadians then one can not afford to miss "Ypres" showing at the Capitol this week.

"Ypres" Salient was like all Salients a problem both to those defending and to those attacking, and the deeds performed in that section of Flanders are strikingly depicted. The producers, have received the co-operation of the War Office, and actual pictures are supplemented by "fakes," so that unless one has actually participated in the fighting one will recognize no flaws in the presentation.

McGill undergraduates, graduates and professors should be especially interested in this picture; for the acts for which Lances-Corp, Fred Fisher, and Captain Frances Schirmer M. D. were awarded the V. C. are shown with a great degree of faithfulness. Both are McGill men.

In a picture of this kind it is only natural that errors will exist; this is inevitable; yet it does not detract from the value of the picture. Nothing like it has ever been seen in Montreal, for it is a grand panorama of heroic deeds and sacrifice; emphasizing the fact "that greater love hath no man than this that a man lay down his life for his friend."

satisfactory measure of support from interests outside the University is practically assured.

"In addition to the above mentioned laboratories the old High Voltage Laboratory situated on the ground floor has been extended into a part of the space formerly occupied by the Foundry, increasing the size about fifty per cent. A modern high voltage testing transformer will be installed as soon as funds are available.

"The new wing was erected at a cost of about \$80,000, of which \$25,000 was donated by the Montreal Light Heat and Power Company; \$15,000 by the Shawinigan Water and Power Company, and \$40,000 each by the Bell Telephone Company and Northern Electric Co. The balance was provided from University funds.

"The remainder of the space on the ground floor formerly occupied by the Smithy and Foundry is being used by the Mechanical Engineering Department as an Internal Combustion Laboratory, the equipment for which was for many years placed in the "Gas House" a building adjacent to the Mining Laboratories which was never well suited for the purpose, but which was accepted as the best possible when no other space was available. The accommodation now provided is excellent. The equipment which has been thoroughly overhauled, erected on proper foundations and provided with the required facilities for testing includes a gas producer, a producer gas engine, gasoline engines of the two

Six Feature  
Acts Shown  
At Imperial

It is very seldom that an audience has an opportunity of seeing six feature acts such as are being shown at the Imperial this week.

In the opening act Ed Levan and Joe Doris present a combination of clever dancing and singing. Torcom Bazazon and Edan White, both famous gramophone artists are heard in a combination of solos and duets. Miss Edna White is a famous trumpeter formerly with Pryor's band and holds the attention of the audience with her playing. Torcom Bazazon is a famous operatic baritone and has a pleasing stage personality.

Arthur Whitelaw the Irish Chatter-box keeps up a flow of talk which causes much laughter. The troubles which a new step-father encounters with his family are portrayed in a musical skit by Arthur Devon and Company.

"Then the Fun Began" is a comical act in which Joe Marks and his company manage to keep their audience in fits of laughter. Mr. Marks is an original comedian of merit and well-deserves credit for his work.

In the last act on the program, "A Dancing Sensation" featuring John Marrone and Alfredo L'Accosta assisted by Senorita Carlita and Mile. Galla various types of dancing are shown.

"The Splendid Road" the feature film depicts the California gold rush of '49 with all its trials and dangers. Those featured in the cast are Anna Q. Nilsson, Lionel Barrymore, Robert Frazer, Pauline Garon, Gladys Brockwell, Edward Earle and Mary Jane Irving.

and four stroke cycle type and coal oil and Semi Diesel Petters engines with a variety of accessories in the way of dynamometers and brakes. Provision is also being made for the testing of oil-burners in domestic heating.

### Hydraulic Lab.

"The space formerly occupied by the A. C. Laboratory on the ground floor of the main portion of the Engineering Building adjacent to the Testing Laboratory has been utilized for installing a modern Hydraulic Laboratory. In the old building destroyed by fire in 1907 the accommodation for hydraulics was considered fairly satisfactory. Since that time, however, make-shift equipment was set up in a corner of the Materials Laboratory and visitors were hurried away quickly. The ground floor of the new space is 25 ft. by 105 ft., but about 1000 sq. ft. additional has been secured by building a balcony along the east side. Under the floor eight reinforced concrete tanks have been built with capacities ranging from 2500 to 4000 gallons. These will be provided with float gauges and calibration scales, and they are so interconnected that they may be drained separately. The water used in any of the smaller experimental units may be discharged into any one of them as desired.

"The most notable new equipment is a 12 inch experimental turbine supplied by the Dominion Engineering Company, with two runners (propeller and Francis types) which is installed in a concrete pressure tank the top of which is at the level of the balcony floor of which it virtually forms an extension affording ample room for working groups. Power is absorbed by an Alden Brake. Water is supplied by a 16 inch Moody spiral pump electrically driven. The suction being from a tank to which the water returns after passing through the turbine. The water is pumped into a pipe line 8 feet above the floor level, passing through a Venturi meter into the pressure tank, flowing thence through the draft tube to a long concrete flume at floor level and discharging over a rectangular notch into the suction tank. A surge tank connected with the pump delivery pipe ensures a steady head.

"Under the balcony is a new steel flume 60 ft. long and 4 ft. wide which can be used for experiments on flow over notches of different widths or dams of different forms. The flume can also be used for rating current meters.

### Testing Pumps

"Arrangements are also made for testing centrifugal pumps, the water discharged being measured by returning it to the tank from which it is pumped over a V-notch. Other new pieces of apparatus are a Pelton wheel with needle regulating nozzle and glass slides through which the action of the jet on the vanes may be seen; also a new experimental pipe line running nearly the whole length of the balcony and back to the starting point. It is made up of pipes of various sizes from 1 to 3 in., containing different types of valves, standard fittings, bends, orifice chambers, etc., and is so arranged that losses of head in any part of the line may be measured. The more valuable parts of the old equipment, some of which were unimpaired, have been retained.

"The new hydraulic installation has cost upwards of \$20,000, but it is now

## NEW MEN NEEDED FOR TRACK TEAM

Coach Van Wagner Says it  
Will be Depleted by  
Graduations

The Track Team will be rather seriously depleted next year by the graduation of such stars like Hurd, Airey and Patterson declared Coach Van Wagner yesterday afternoon when interviewed. The need of new material is more important this year than it has been for a long time. The success of the McGill Track Club in past performance was due chiefly to the great enthusiasm shown by the aspirants desiring places on the team the coach said.

Every opportunity is given to those who would care to practice in preparation for the McGill Interfaculty Track Meet at the M.H.S. Gym every day from 5 to 6, and at the Craig Street Drill Hall on Monday, Wednesday and Friday from 7 to 8.

This is the only way for those who are anxious to gain a place on the outdoor track team to get into condition and obtain valuable coaching. Now is the only time to get individual attention from the coach as in the fall the time allotted to training is very short.

The entries received by the manager are as follows:—

Two miles	600 yards
W. Budden	W. Budden
W. Patterson	W. Patterson
G. Brown	G. Brown
J. King	G. Brown
300 yards	60 yards
J. Harris	T. Darling
T. Darling	Harris
G. Sutton	

If there will be enough entries there will be the 1000 yards race declared Coach Van Wagner. Up till yesterday many entries were received from the M. A. A. A., and the N. A. A. A., and the open events. To encourage newcomers the coach mentioned that members of last year's outdoor track will not compete in these interfaculty events.

### Universities Invited

McGill, University of Toronto and Queen's have been invited by the 91st Regimental Athletic Association to compete at Hamilton on March 13th in a special college medley relay race consisting of 440 yards, two to 220 yards, and 880 yards. This meet is the largest and best that is held in Canada and any new records that are broken are recorded by the A. A. U. Last year both the meet and relay was won by the University of Toronto. The reason of their success was mainly due to intensive training and keen interest shown by the student body in such sport.

in very satisfactory shape for instructional work and the courses will be accordingly strengthened. Congestion in the Testing Laboratory has also been relieved and a separate laboratory has been provided for cement and concrete work—a much needed improvement.

"On the whole it is well within the mark to say that no year for more than a quarter of a century has brought such considerable improvements to the facilities required for the work of the engineering departments as has the year 1924."

## ORIENTALS IN EMPIRE BIG PROBLEM

Continued from Page One  
Concluding Tennant said that the situation is not one of immediate concern but it must be given thought and consideration.

Following Tennant came Nairn. He began the discussion of the status of the various races in India with a short history of the country. From the time the East India Company began its operations until to-day there has existed the problem. He traced the rise and expansion of the India Civil Service the finest and highest developed in the world.

### Lack Education

The lack of educational facilities has been one of the greatest questions the country has had to contend with. The traditional division of the people into castes whose fixedness has been of such rigidity that it could not be bent one way or the other has been a disintegrating force. There could be no education of the masses as long as they were separated by religious and social prejudices.

The year 1883 was a turning point in Indian history stated Nairn. In that year there were established courts where British citizens might be tried. It was the introduction of a system of privileged legality.

Ghandi and the passive resistance policy of his disciples was then taken up by the speaker. The policy of non-co-operation and antagonism must be superseded by a feeling of mutuality Nairn asserted.

The dream of the radical element to erect a Mohammedan Empire cannot materialize. There is no Indian nationalism. The Indians are separated by religious and social differences.

The solution of the problem lies in the gradual recognition on the part of the British Government of the native policy of co-operation between the British and the Indians foremost education to overcome prejudices or

## INTERMEDIATE TEAM TO PLAY Y. M. H. A.

Basketballers Will Meet Quintette in Season's Last Match To-night

To-night at the High School gymnasium the McGill Intermediate basketball team will meet the Y. M. H. A. quintette for their last game of the season. The McGill seconds got off to a bad start at the beginning of the season and as a result are not in the running for the championship. A win to-night, however, will put them in second place in the league standing. The Y. M. H. A. will field a strong team for to-night's game and will try to avenge the defeat the McGill team handed out to them on their own floor. The McGill seconds, however, have been going at top form and expect to have little difficulty in winning to-night's encounter. Captain Fred Weldon will lead into the field a snappy bunch of ball tossers. On the forward line Loomis and Statner are sure point getters. "Check" Schwartzman who was put out of the game earlier in the season on account of an injury to his knee will be ably substituted by McRoberts. A husky lad who knows how to stop them from scoring. Johnson plays the other defense position and plays it well. Johnson can also be depended upon to score a basket or two.

This year's Intermediate team is the strongest McGill has had for a long time and if fate had been kinder they might have been in line for the championship. As it is they play a flashy game and it will be worth while to come out and watch them put their stuff across.

religious and caste systems. Nairn concluded.

Sir Arthur Currie speaking briefly favoured the Canadian policy of excluding the Japanese. Since England had a surplus of about five millions why should not Canada so arrange her policy as to allocate to herself these people.

A keen discussion followed.

PLEASE BE PUNCTUAL

# JAZZ TEA TO-MORROW

Music by  
Reg. Winn  
and his orchestra.

## NOTICES

All matter for this column must be in the Daily Office BEFORE 8 p.m. of the day previous to publication. It must be brief and to the point, and

legibly written on one side of the paper. Notices in regard to meetings, etc. will not be accepted until three days after the hour stated above. THERE WILL BE NO EXCEPTIONS TO THESE REGULATIONS.

### GENERAL

**SOCIOLOGICAL SOCIETY**  
Final meeting of the year will be held jointly with the Psychological Society in the Biological Building, Thursday evening, March 11th, 8 p.m.

### RADIO ASSOCIATION

This association will visit the Northern Electric Co.'s Broadcasting station CHYC on Wed. March 10th. The party will leave the Engineering Bldg. promptly at 5 p.m. All those interested are invited to come.

### HISTORICAL CLUB

Annual meeting for election of officers, Wednesday, March 10 at five.

### SCARLET KEY MEETING

The regular Monthly Meeting of the Scarlet Key Society will be held in the Union on Thursday, March 11th at 8 o'clock sharp.

### BAND

Band broadcasting from C. N. R. Thursday night. Before going down to station, there will be a dinner and general meeting in the Annual Room of the Union, at which business and plans for coming year will be discussed and possibly the next bandmaster elected.

### RIFLE ASSOCIATION

Rifle Association Dinner in Grill Room of Union Thursday.

### RED AND WHITE REVUE

Ushers and Marshals, please leave arm bands and ribbon with Mr. Fletcher, the Union as soon as possible.

### CHEMISTRY COLLOQUIUM

At the Chemistry Colloquium on the 10th, March Miss. Helen Chalmers will be the speaker and will introduce for discussion the subject of "Lensed Oil."

### ATHLETICS

#### BOXING

Tuesdays and Thursdays 4-6.

#### TRACK PRACTICES

Indoor track practices will be held on Mondays, Wednesdays and Fridays from 7 to 8 at Craig St. Drill Hall and every day from 5 to 6 in M. H. S. gym.

Entries for the indoor interfaculty meet may be handed in to the assistant manager.

#### INTERMEDIATE HOCKEY

All Intermediates turn in their equipment tagged with name to open trunk in Rowing Room in Union.

#### SWIMMING CLUB MEETING

The annual meeting of the McGill Swimming and Water Polo Club will be held on Thursday, March 11th at 5.00 p.m. in the Music Room at the Union. All members are asked to attend as the executive for the following year are to be elected.

#### COLOUR MEN

Colour men who have won their letters this year are requested to bring their certificates to the Athletic Manager's Office in order that they might be entree to date.

#### M. W. S.

##### M. W. S. A. A.

Nominations for the offices of President and general Secretary-Treasurer of the M.W.S.A.A. signed by five members of the Association, are called for. The President and Secretary-Treasurer may not be members of the same year.

Nominations are to be handed in to the Secretary-Treasurer of the M.W.S.A.A. by 1 o'clock on Saturday, March the 13th. The elections will take place on Friday, March the 19th from 10 a.m. until 5 p.m.

##### SOCIETE FRANCAISE

Three plays will feature the final meeting of the Societe Francaise on Thursday afternoon at 4 o'clock in the R. V. C. Tea will be served as usual.

##### M. W. S. S. ATTENTION!

Nominations for the office of President of the McGill Women Students' Society are called for.

These nominations are to be in writing, and supported by ten members of the McGill Women Students' Society. They must be handed to the Secretary, Miss B. Green R. V. C.

## IS GRATIFIED WITH LECTURE RESULTS

### Prof. F. E. Lloyd Returns From Trip to the United States

"With an audience of imagination, intelligence and the desire to understand, it is a very simple matter to give them a clear idea of what is going on in microscopic plant life," stated Professor F. E. Lloyd, head of the Biological Building who has just returned from a lecture trip to the United States when interviewed last night.

"This has been tried with an audience of laymen and I have good reason to believe that my efforts met with success," the professor declared.

It was while being shown at a meeting of the American Botanical Society at Kansas City last Christmas that the moving picture films which Professor Lloyd took here first gained attention. As a result of this an invitation was extended to him to show his pictures at the University of Illinois.

Prof. Lloyd also gave a lecture at the University of Chicago on "Cell Disjunction," and at the University of Michigan on the general development and reproduction of spirogyra. On Saturday next Prof. Lloyd will talk to the Royal Canadian Institute at Toronto.

In the forthcoming issue of the "Scientific Monthly" there will be printed in popular form an account of the work carried on by Prof. Lloyd on the reproduction of spirogyra. It will be illustrated by a number of original photomicrographs. The scientific results are also on the press now and will be seen in the Transactions of the Royal Canadian Institute and of the Royal Canadian Society, soon.

## ARTS WINNERS IN BASEBALL OVER SCIENCE

(Continued from Page two)

hit out. Held is walked. Menzies scores on Covshoff's hit. Held came in on Senzilet's sacrifice hit. Covshoff passed the plate on Herman's hit. Musselman is hit out, 3 runs—3 out.

#### Fifth Inning

Loomis is fanned. Jehu is hit out. Chisholm is struck home, 0 runs—0 hits. Golfman hits a triple. Laing is hit out. Menzies is walked. Golfman is put out on third by Crombie. Leithman hits a double. Held is caught out, 0 runs—3 out.

#### Sixth Inning

Munro is safe on first. Crombie hits a single. Godwin is walked. Spratt is walked with three on base, scoring Munro. Cramp sacrifices to score Crombie and Godwin. Consiglio's double scores Spratt. Loomis and Jehu are caught out, 4 runs—3 out. Covshoff is safe on first. Senzilet hits but is out on second. Herman hits scoring Covshoff. Musselman doubles. Golfman doubles scoring Herman and Musselman. Laing hits to deep centre. Golfman is caught out at third. Menzies is walked.

before 1 o'clock on Saturday, March 13th.

#### STUNT NIGHT TICKETS

"Tickets for the annual R.V.C. 'Stunt Night' scheduled for March 16 at the Strathcona Hall are now on sale. They may be purchased for 25 cts. at the Strathcona Hall, R.V.C., and from members of the S.C.A. Cabinet.

#### C. O. T. C.

##### Special Order

A. and B. Examinations  
All candidates are reminded that, whilst they will be issued with protractor's in the examination-room, they must bring their own pens, coloured-pencils, rubbers, etc.

B. Candidates are reminded that they will have an examination on Wednesday. By arrangement with H. Q. this examination will be held on Wednesday afternoon commencing at 2 p.m.

#### J. W. JEAKINS,

Major and Adjutant.

#### LOST AND FOUND

##### FOUND

A ladies gold ring, with McGill Crest, was found at the Wednesday evening performance of the Red and White Revue at His Majesty's Theatre. Owner may have same by applying to Fred S. Urquhart of Arts '29 or Mr. Gentleman, Arts Building.

##### LOST

On Saturday morning, a Wahl gold fountain pen, between Atwater Ave and McGill University via Sherbrooke and McTavish. Will finder please return to F. Stocking, R. V. C. '26 or to the janitor of the Arts Building.

##### LOST

At His Majesty's Theatre in dressing room 12, a pair of fawn chamollette gloves. Finder please return to E. P. McNaughton, R. V. C. '28.

The preliminary estimate of the total yield of potatoes in Canada in 1925 is 44,497,000 cwt. from 546,891 acres, as compared with 56,648,000 cwt. from 561,628 acres, in 1924, according to the Dominion Bureau of Statistics.

1 2 3 4 5 6 7

Science.....1 0 0 0 0 4 1

Arts.....0 3 5 3 0 6 —

## VARSITY BEGINS TO ROUND OFF ACTIVITY

### With Exams Eminent U. of T. Men Begin to Conclude The Year's Events

(Special to McGill Daily)

Toronto, March 9.—Student activities at the University of Toronto are fast reaching their climax with the examinations now eminent. The various organizations are all completing their programs for the year while final events are being held in all aspects of college life.

The last issue of the Varsity, the undergraduate paper, is coming out March 12 it has been announced here. In the meantime a controversy has been started over an interfaculty hockey game. Latchford complains in connection with the refereeing.

The first sculpture exhibition here is to start in Hart House on March 15, when prominent works of Miss Wyle and Loring will be on view.

The college elections were held on Monday. They were comparatively peaceful. The annual scrap did not materialize.

Varsity Women's Basketball team defeated Western University here on Monday night. The feature of the event lay in the fact that the women discarded usual regulations, adopted for this game the boys' rules.

#### Criticize Debate

A debate on the subject "Resolved that this house would rather be Mary Pickford than Agnes MacPhail" held by the University College Women's Union patterned on the Hart House debates has aroused considerable criticism here.

## CAMPUS GROUP TALKS ABOUT SOCIETIES HERE

(Continued from Page One)

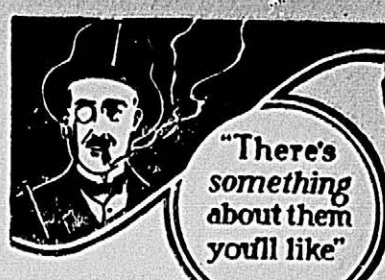

The McGill Daily was subjected to much criticism at the meeting. That the Daily should be more of an outlet for student literary opinion was a point firmly insisted upon. Some wire of the opinion that if the students submitted their literary articles to the Daily a literary page could be inserted and there would be no necessity for the Fortnightly Review. The Fortnightly it was claimed interests only a very small minority in Arts, Law, Science and Medicine not being especially desirous of culture—whereas,

If a literary article is inserted in the Daily it reaches practically every student. Others were of the opinion that, though cultural articles should appear in the Daily from time to time, the Fortnightly should continue to live.

At the present time, it was declared, there was a very meagre editorial page. The editorial page it was stated is the logical place for literary discussion and cultural rhetoric. There, such articles would be read by several students, while in the Fortnightly only a very small minority would read them. Moreover, criticisms and discussions on the literary articles could be effectively carried on in the Correspondence columns—not under a nom de plume but, under the name of the author or authors. Finally, it was suggested that the Daily staff endeavour to raise the tone of the paper.

To raise to level of the Daily a larger staff is needed; to obtain a larger staff more interest among the students. Original stories, literary articles, political and philosophical dissertations, would appear often in the paper if there was a larger staff and if the students at large would realize that the Daily is ever willing to receive any literary contributions of merit to round out the editorial page.

Due to pressure of time the discussion ended at this point. It will be continued at next week's meeting of the group. All those who have ideas to offer on the problems are urged to be present, the leader announced.
